

wonder

the Hubble Space Telescope

observatory

launch... into orbit

incredible

image

the universe

beyond

share A with B

If you've ever looked up at the sky and thought, "I wonder what the Hubble Space Telescope could see on my birthday," well, now you can know. The observatory was launched into orbit in 1990. It's taken some incredible images of the universe beyond it, and NASA says it has one for your birthday. If you know the month and date of your birth, Hubble has taken a picture of space that NASA will share with you.

If you've ever looked up at the sky and thought,

"I wonder what the Hubble Space Telescope could see on my birthday,"

well, now you can know.

The observatory was launched into orbit

in 1990.

It's taken some incredible images of the universe beyond it,

and NASA says

it has one for your birthday.

If you know the month and date of your birth,

Hubble has taken a picture of space

that NASA will share with you.
