pilot time

jet

(be) no big deal

applications

Have you ever wanted to go to the dark side of the moon? Well, now's your chance. NASA is looking for a new generation of astronauts. Currently, they have 48, but they say they need more for distant space exploration. And, of course, you need just a few requirements, including an advanced degree and more than 1000 hours of pilot time in a jet— no big deal there. Applications open March 2nd. Good luck.

Have you ever wanted to go
to the dark side of the moon?

Well, now's your chance.

NASA is looking for a new generation of astronauts.

Currently,

they have 48,

but they say they need more for distant space exploration.

And, of course,

you need just a few requirements,

including an advanced degree and more than 1000 hours of
pilot time in a jet—

no big deal there.

Applications open March 2nd.

Good luck.
