NASA says its ambitious project to put the first woman on the moon will be named Artemis. In Greek mythology, Artemis, the twin sister of Apollo, is the goddess of the moon. President Trump is putting NASA under serious deadline pressure, bringing forward the target for its next lunar landing from 2028 to 2024. NASA says he's now proposing an extra \$1.6 billion of funding for the project, to help make it happen.

NASA says

its ambitious project to put the first woman on the moon will be named Artemis.

In Greek mythology,

Artemis, the twin sister of Apollo,

is the goddess of the moon.

President Trump is putting NASA under serious deadline pressure,

bringing forward the target for its next lunar landing

from 2028 to 2024.

NASA says

he's now proposing an extra \$1.6 billion of funding for the project,

to help make it happen.
